WHY VOLT EXISTS

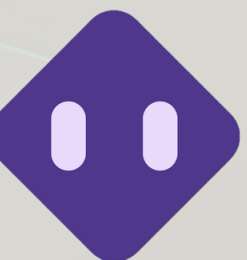

The future of health technology isn't just about tracking behavior—it's about understanding it.

VOLT combines artificial intelligence, behavioral insights, and modern mobile engineering to create a health platform that actively helps users make better decisions every day. By turning data into meaningful action, VOLT empowers individuals to build healthier habits and achieve their goals with confidence.

AGENDA

- The Problem
- The Solution
- Meet Aira
- Product Features
- Technical Architecture
- Market Opportunity
- Monetization
- Acquisition Opportunity

OUR VISION

To build an AI-native health platform that actively helps users improve their daily habits through intelligent coaching, behavioral insights, and automation.

Unlike traditional trackers, VOLT works proactively in the background to keep users accountable.

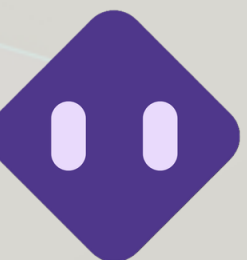

BUILT BY

Founder & Product Engineer **Atchyuteswar Gottumukkala**

Built VOLT end-to-end including:

- Android application
- AI architecture
- Backend systems
- Cloud automation
- Database design
- Notification infrastructure
- Product strategy

CORE PLATFORM FEATURES

Nutrition Intelligence **Calories, Protein, Carbs, Fats**

Track daily nutrition with detailed macro breakdowns and personalized goals. Users can log meals effortlessly while monitoring calories, protein, carbohydrates, and fats in real time.

Hydration Monitoring **Smart water tracking and reminders**

Monitor daily water intake through an intelligent hydration system. Automated reminders and progress tracking help users maintain healthy hydration habits throughout the day.

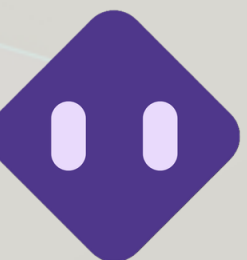

AI Coaching **Daily personalized insights**

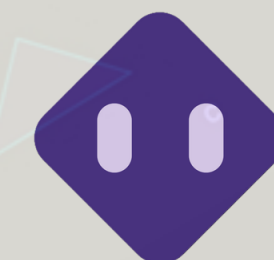

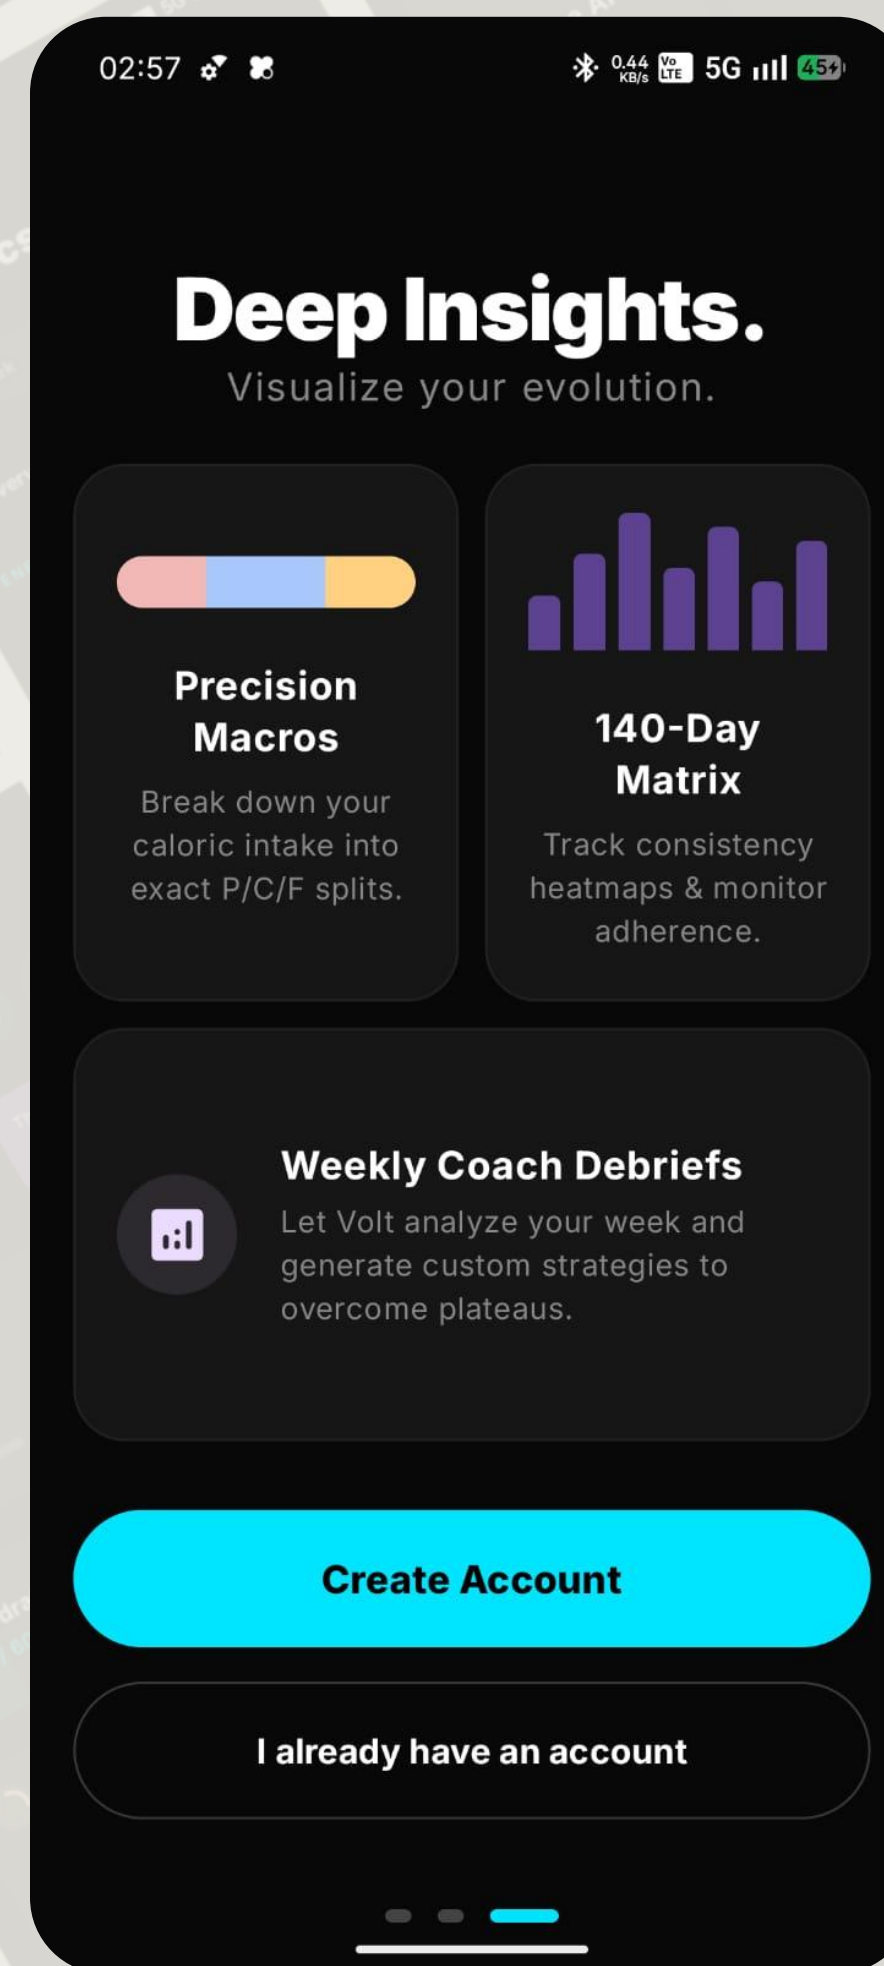

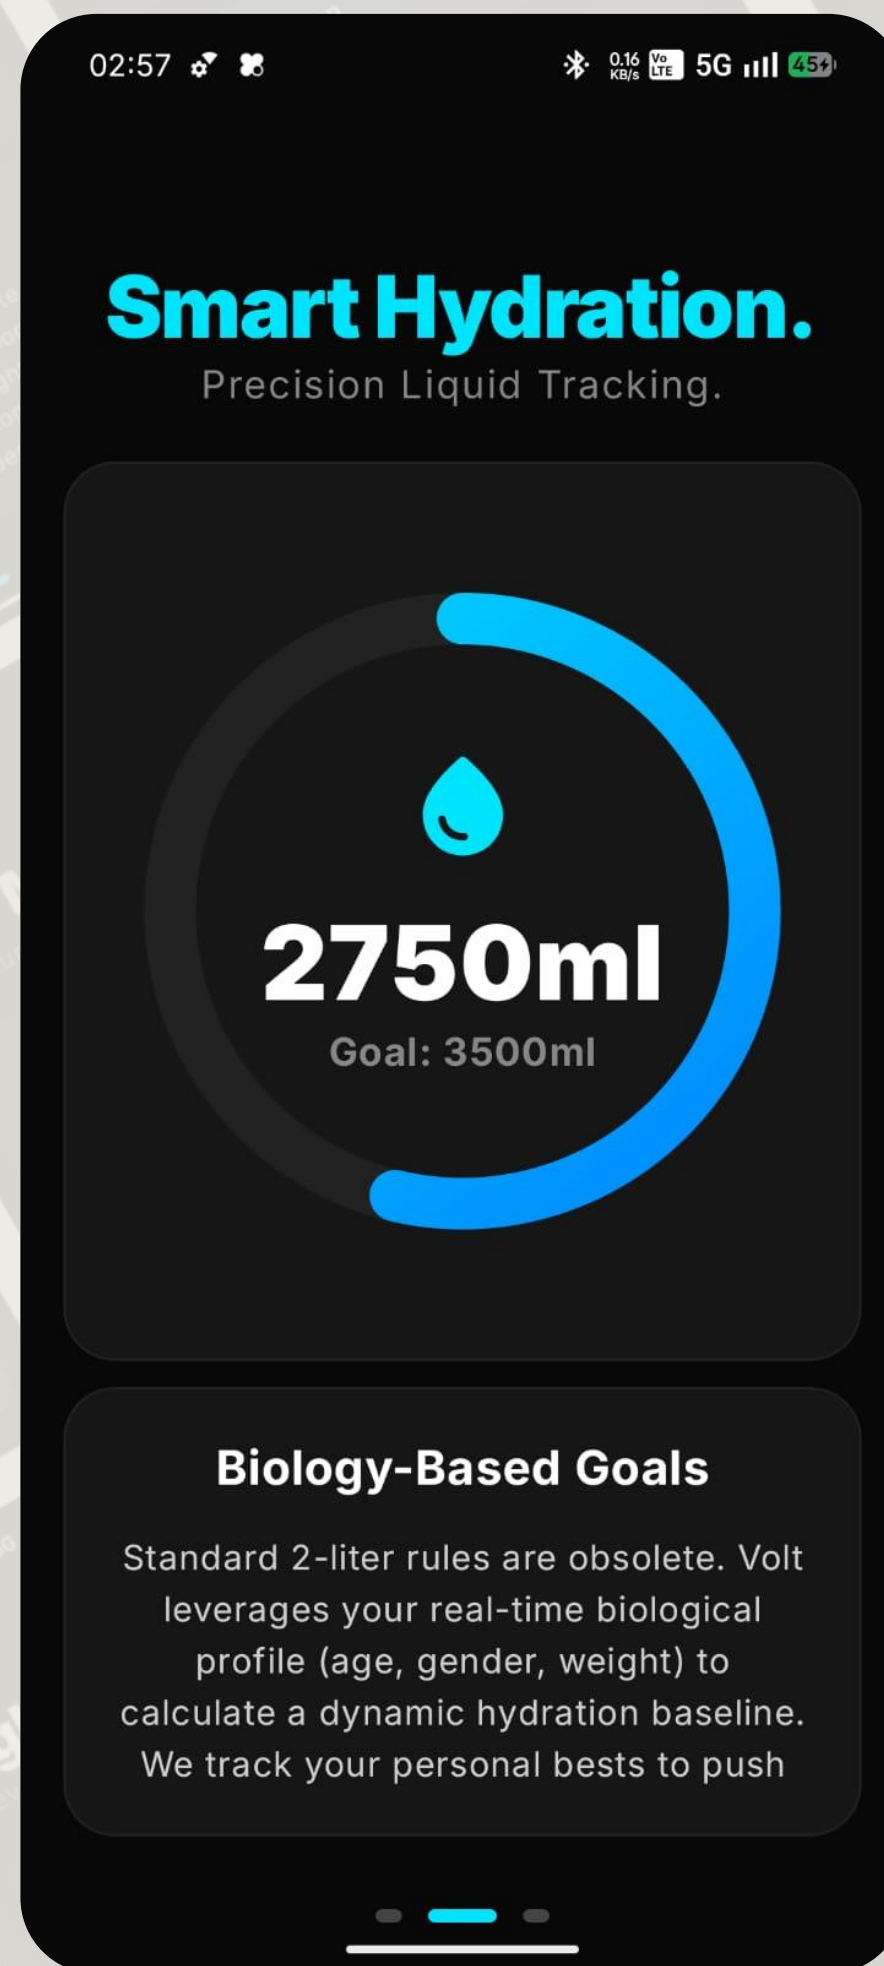

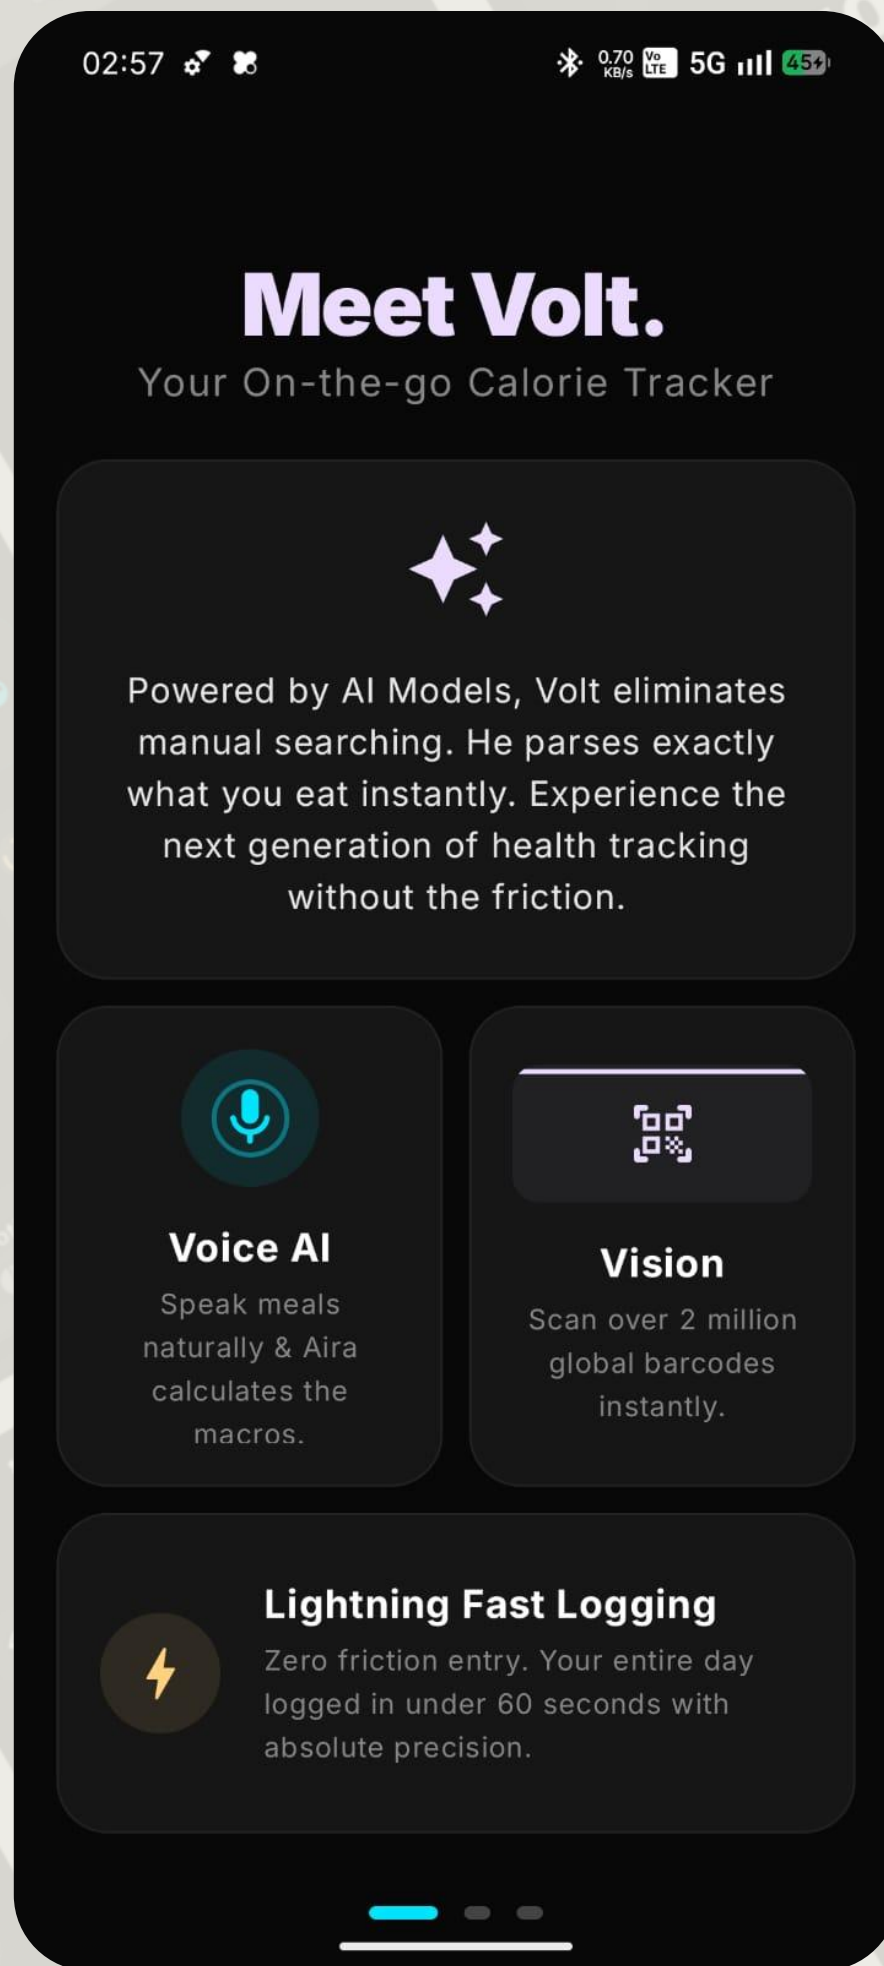

Powered by Aira, the autonomous AI coach that analyzes nutrition and hydration behavior to deliver personalized recommendations, motivation, and actionable daily insights.

Intelligent Engagement **Proactive engagement system**

A multi-layered notification engine combining cloud intelligence and local automation to deliver timely reminders, coaching updates, and engagement prompts.

WHY VOLT IS DIFFERENT

Autonomous AI Coaching

Aira analyzes user nutrition and hydration patterns daily, generating personalized coaching insights and proactive recommendations without requiring user prompts.

Premium Mobile Experience

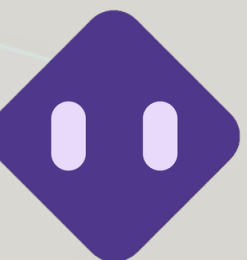

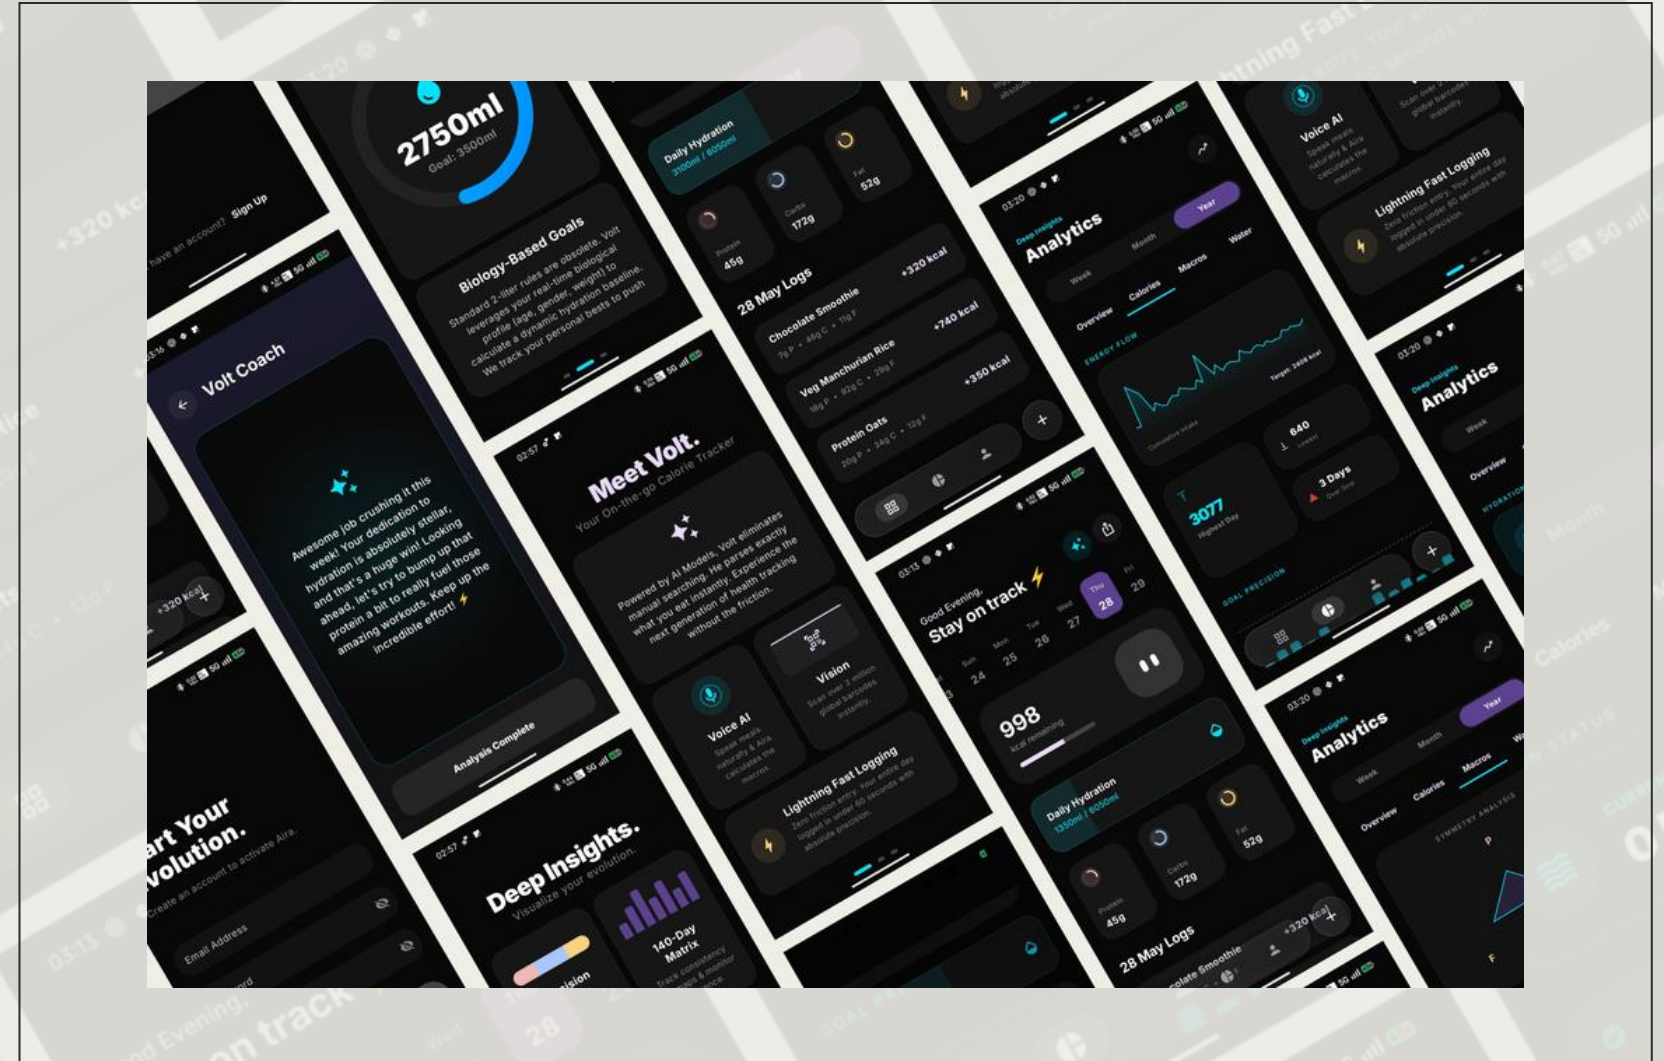

Built natively with Kotlin and Jetpack Compose, VOLT delivers fluid animations, adaptive themes, modern Android design principles, and exceptional user experience.

Cloud-Native Intelligence

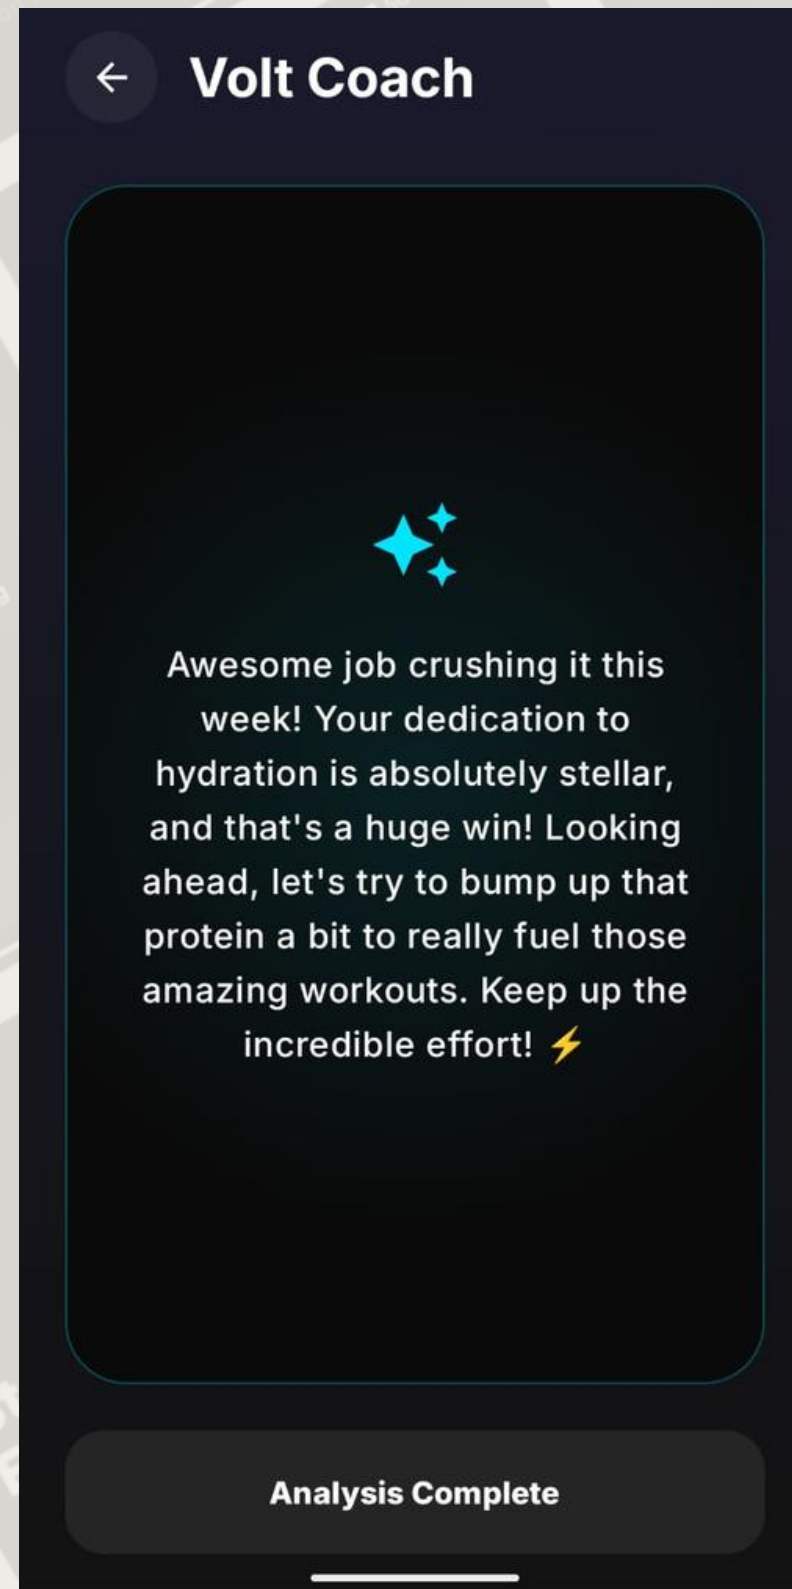

AI processing runs entirely in the cloud through serverless edge functions and automated workflows, ensuring reliability, scalability, and minimal device dependency.

Multi-Modal Tracking

Users can log health data through barcode scanning, voice input, and manual entry, creating a frictionless experience that encourages long-term engagement.

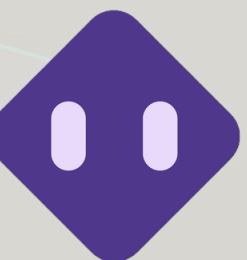

AIRA: THE AUTONOMOUS AI COACH

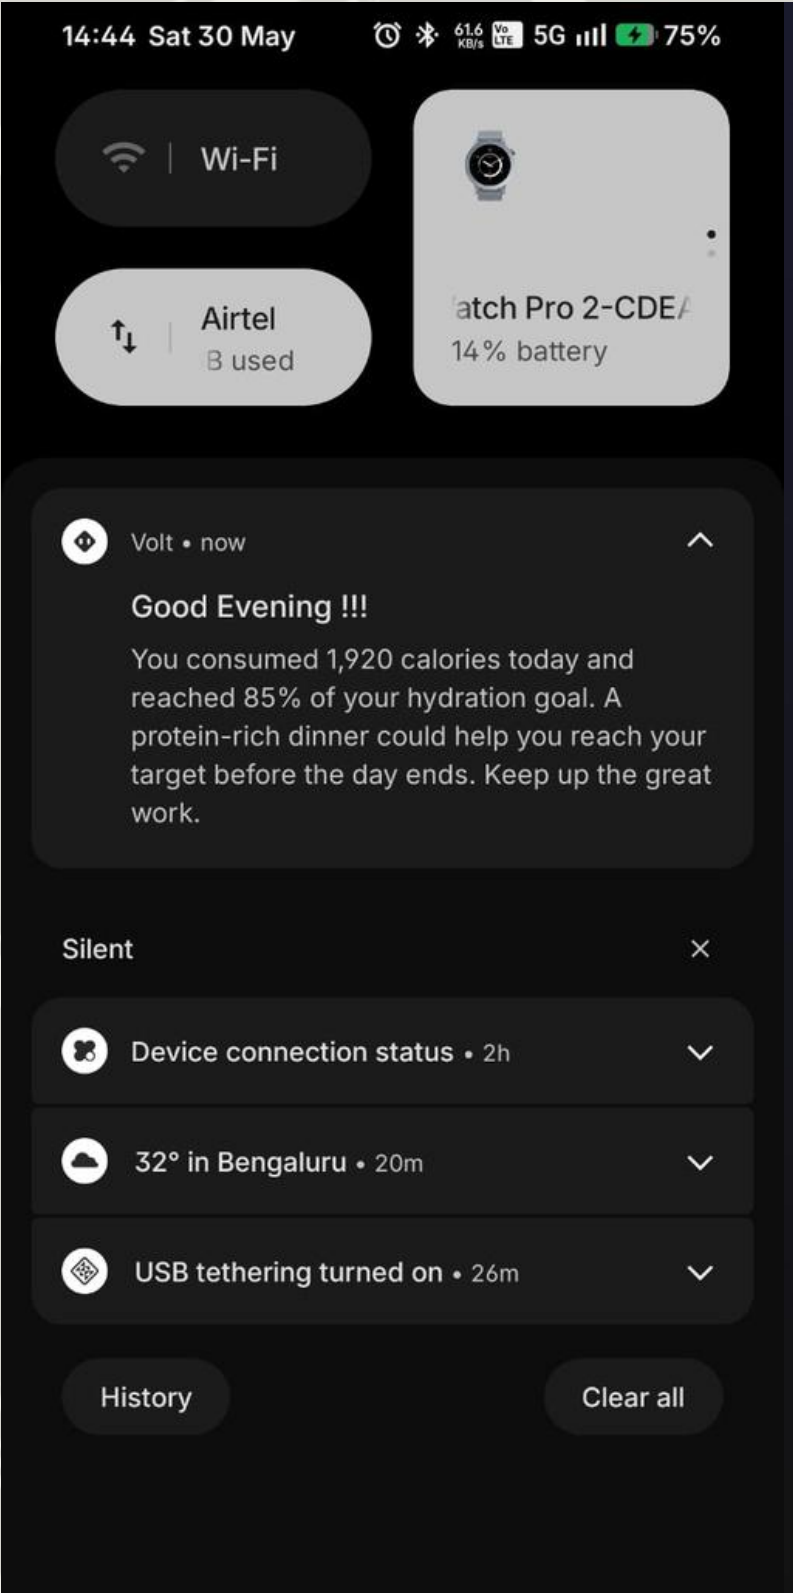

Health Tracking That Thinks For You

Unlike traditional health applications that simply collect data, Aira actively analyzes nutrition and hydration behavior to provide personalized coaching, motivation, and actionable recommendations.

Every evening, Aira reviews the user's daily progress and delivers intelligent insights designed to encourage healthier habits and improve long-term consistency.

AIRA: THE AUTONOMOUS AI COACH

Proactive Insights

Aira initiates conversations without requiring user interaction.

Daily Analysis

Reviews nutrition intake, hydration progress, and goal completion.

Personalized Coaching

Generates contextual recommendations tailored to individual behavior.

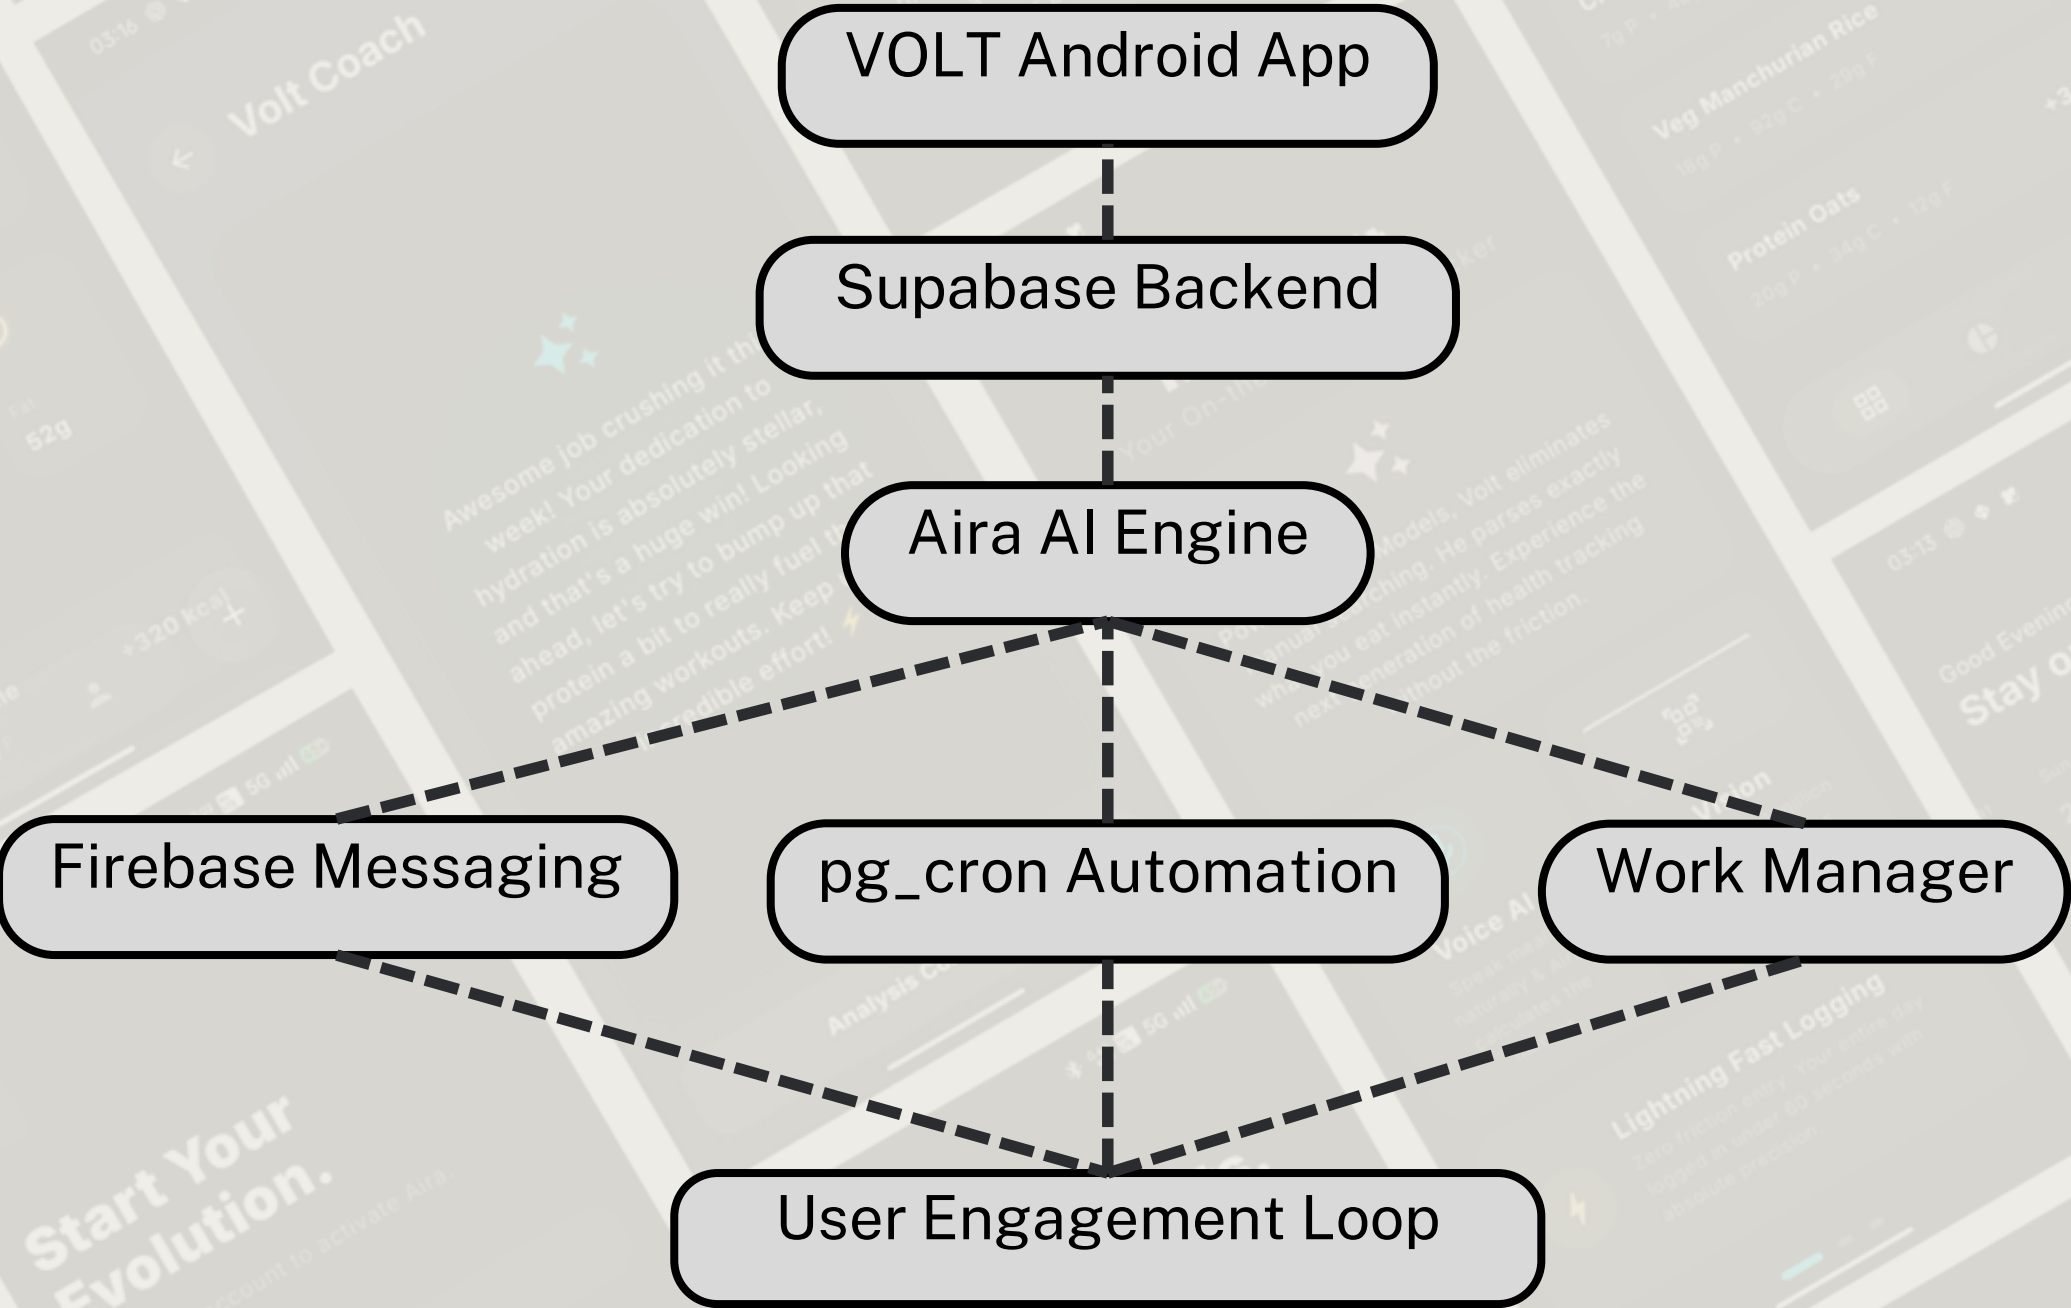

Cloud-Powered Intelligence

Runs through automated serverless infrastructure independent of the device.

TECHNICAL FOUNDATION

Built for scalability, reliability, and future growth.

Native Android Development

Built entirely in Kotlin and Jetpack Compose, delivering modern performance, fluid animations, and a premium user experience.

Cloud Infrastructure

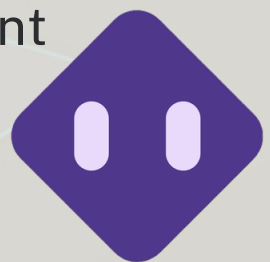

Powered by Supabase and PostgreSQL with secure authentication, real-time synchronization, and Row Level Security.

AI Orchestration

Serverless Edge Functions process AI workflows and generate personalized coaching insights through Aira.

Intelligent Automation

Automated scheduling, push notifications, and local background processing ensure consistent user engagement.

WHY ACQUIRE VOLT ?

Production Ready

VOLT is a fully developed and operational platform with a complete Android application, cloud backend, database architecture, notification infrastructure, and AI orchestration layer already implemented. The product can be deployed, scaled, or commercialized immediately, significantly reducing development timelines and engineering costs.

AI Infrastructure Included

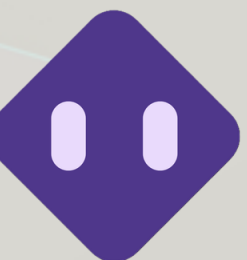

At the core of VOLT is Aira, an autonomous AI coaching engine designed to analyze user behavior and generate personalized health insights. The serverless architecture, automation workflows, and notification systems are already integrated, providing buyers with a ready-to-use AI engagement framework.

Modern Technology

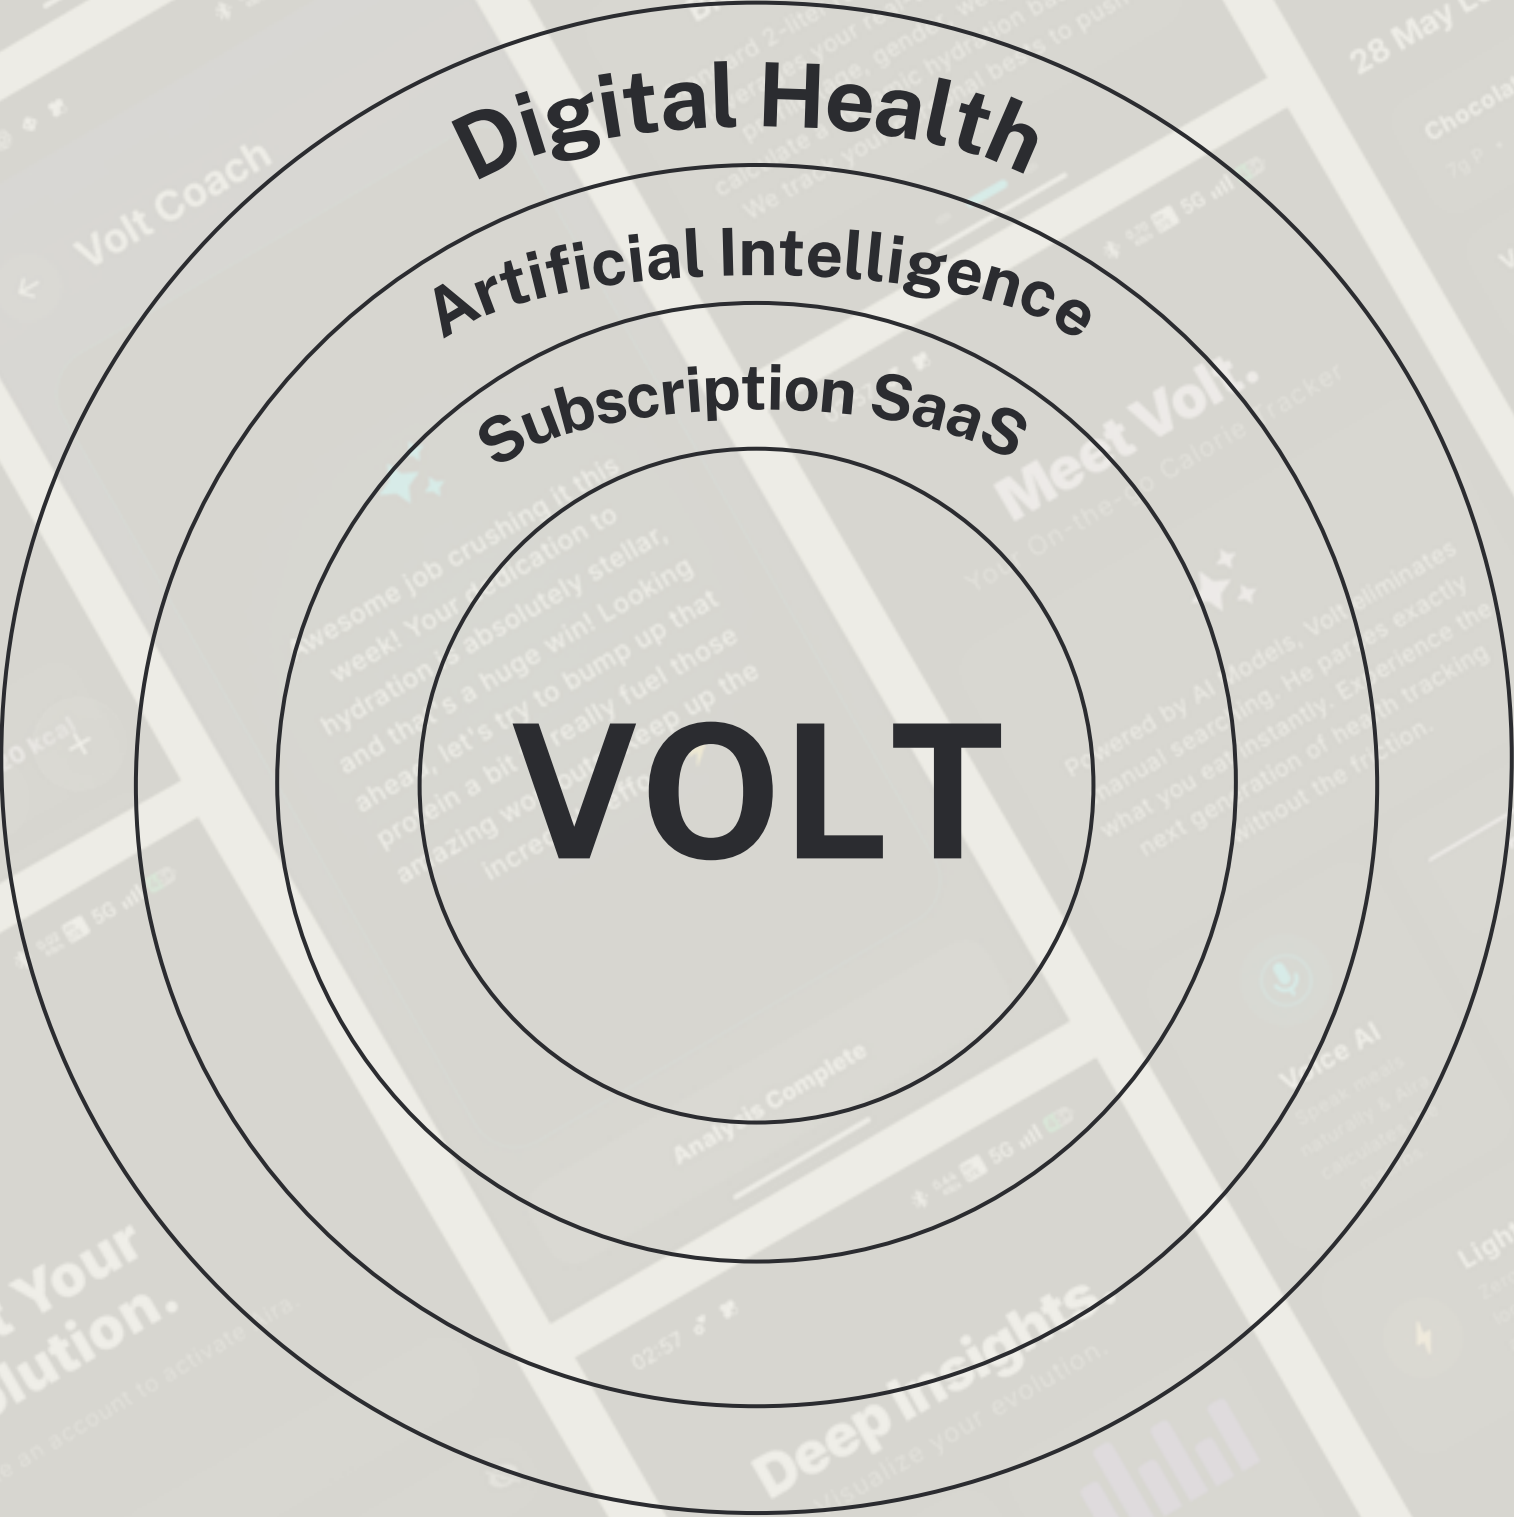

Built using Kotlin, Jetpack Compose, Supabase, PostgreSQL, Deno Edge Functions, Firebase Cloud Messaging, and WorkManager, VOLT is engineered on a contemporary technology stack that prioritizes scalability, maintainability, performance, and future extensibility.

Fast Market Entry

Acquiring VOLT allows organizations to bypass months of product development, infrastructure setup, UI/UX design, testing, and architecture planning. Instead of building from scratch, buyers gain immediate access to a polished platform positioned for rapid market deployment.

MARKET OPPORTUNITY

Digital Health

Consumers are increasingly adopting digital solutions to monitor nutrition, hydration, fitness, and overall wellness. Health tracking has evolved from a niche category into a mainstream daily habit.

Artificial Intelligence

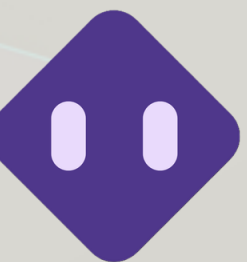

AI is transforming consumer applications by enabling personalized experiences, intelligent recommendations, and proactive engagement that traditional software cannot provide.

Subscription SaaS

Recurring revenue models continue to dominate the software industry, creating sustainable growth opportunities through premium features, coaching services, and personalized experiences.

VOLT combines AI-powered coaching, health intelligence, and subscription-ready infrastructure to capitalize on one of the fastest-growing categories in consumer technology.

MARKET SIZE

\$650B+

TAM - \$650B+

Global digital health and wellness industry, including fitness, nutrition, preventative healthcare, and consumer health technology solutions.

\$95B+

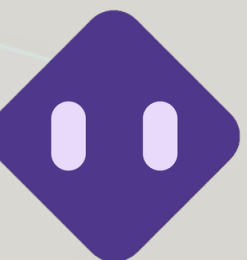

SAM - \$95B+

Mobile health applications, nutrition platforms, wellness tracking software, and AI-powered health engagement solutions.

\$12B+

SOM - \$12B+

Consumer nutrition coaching, hydration monitoring, AI wellness assistants, and subscription-based health optimization platforms.

FUTURE Revenue Opportunities

Consumer **Subscription**

The platform architecture is designed to support premium AI coaching, advanced analytics, personalized wellness insights, and future subscription-based offerings without requiring major infrastructure changes.

VOLT has been built with commercialization flexibility in mind, allowing future operators to pursue multiple business models based on their market strategy and growth objectives.

Corporate **Wellness**

VOLT can be adapted into an employee wellness solution, allowing organizations to provide health tracking, hydration monitoring, and AI-driven engagement to their workforce.

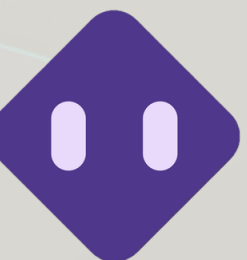

White-Label **Licensing**

The platform can be rebranded and licensed to fitness centers, nutrition coaches, wellness startups, and health-focused organizations seeking a ready-to-launch solution.

Strategic **Partnerships**

Future integration opportunities include meal delivery services, supplement providers, fitness brands, wearable ecosystems, and digital health partners.

WHAT'S INCLUDED

The acquisition includes the complete VOLT technology ecosystem, documentation, infrastructure configurations, and intellectual property required for continued development, commercialization, and deployment.

Native Android Application

Complete Kotlin and Jetpack Compose codebase featuring nutrition tracking, hydration monitoring, AI integration, modern UI components, adaptive theming, and production-ready architecture.

Notification & Automation Systems

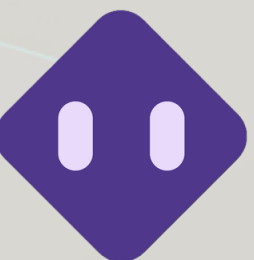

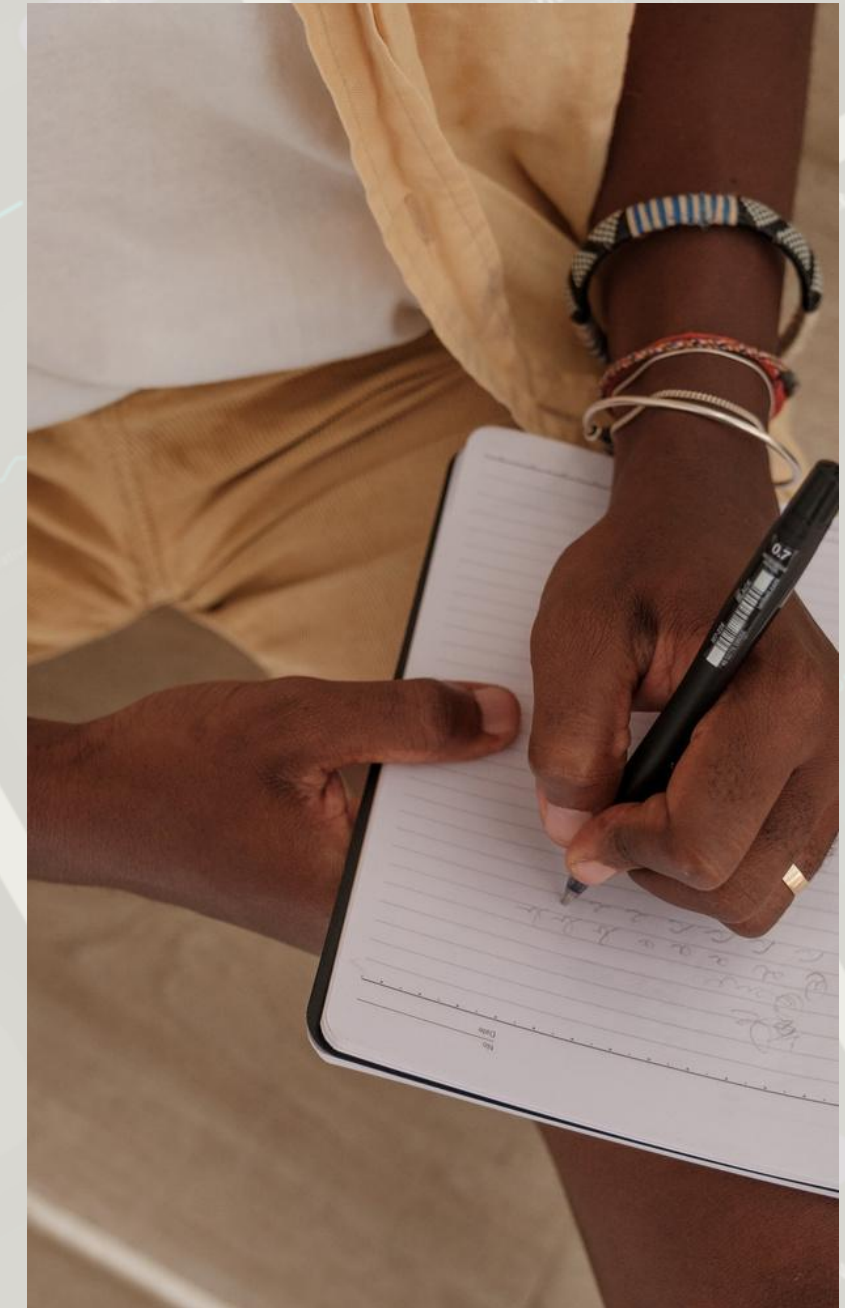

Integrated Firebase Cloud Messaging infrastructure, pg_cron scheduled automation workflows, and Android WorkManager background processing systems.

Aira AI Coaching Engine

Server-side AI orchestration layer powered by Deno Edge Functions, automation workflows, and intelligent notification systems designed to deliver personalized coaching experiences.

Documentation & Technical Assets

Technical architecture diagrams, deployment documentation, database structures, API configurations, development guides, and operational workflows.

WHAT'S INCLUDED

✓ Complete Source Code

✓ Cloud Infrastructure

✓ AI Systems ✨

✓ Database Architecture

✓ Deployment
Documentation

✓ Product Branding

✓ Technical Assets

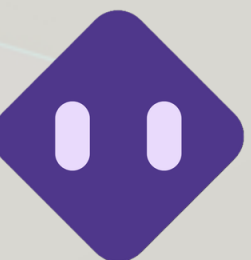

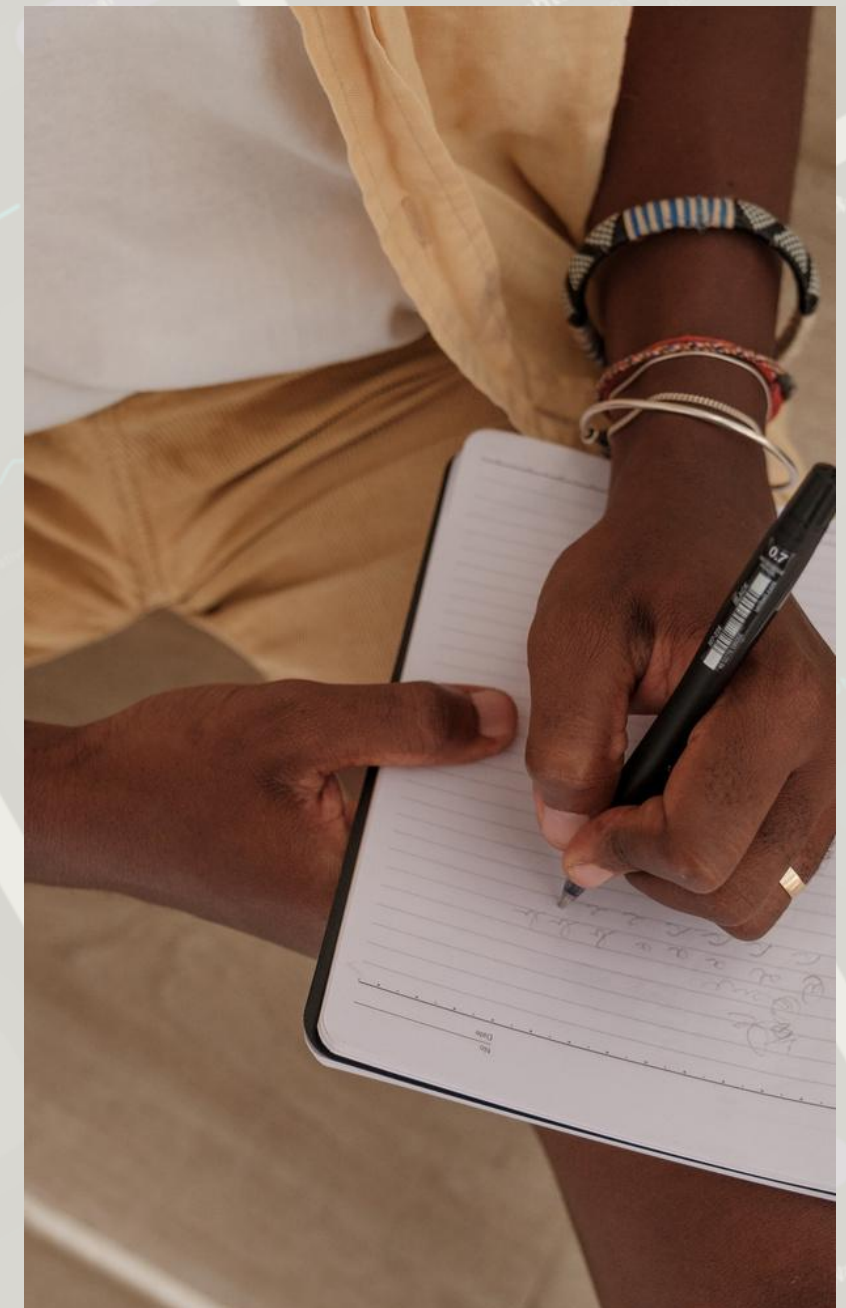

✓ Acquisition Deck

Cloud Backend Infrastructure

Supabase backend including PostgreSQL database schema, authentication systems, Row Level Security policies, and cloud deployment configurations.

Branding & Product Assets

VOLT branding materials, logos, application assets, presentation materials, architecture visuals, and acquisition documentation.

COMMERCIALIZATION ROADMAP

VOLT has been built on a scalable foundation designed for long-term expansion. The roadmap below highlights potential growth opportunities available to future operators, investors, and strategic partners.

Market Launch **Q1**

Launch VOLT to early adopters, fitness enthusiasts, and wellness-focused consumers while gathering user feedback and validating engagement strategies.

AI Expansion **Q2**

Enhance Aira with deeper behavioral analysis, personalized wellness recommendations, and advanced coaching capabilities powered by modern AI models.

Platform Growth **Q3**

Introduce iOS support, wearable integrations, and broader ecosystem connectivity to expand accessibility and increase user retention.

EP & WL **Q4**

Expand into corporate wellness programs, fitness organizations, and white-label deployments for brands seeking a ready-made health platform.

Global Scaling **Q1**

Leverage the existing cloud architecture to support larger user bases, international markets, and strategic health-tech partnerships.

With its modern architecture and AI-native foundation, VOLT provides a clear path from product acquisition to scalable commercial growth.

IDEAL ACQUISITION PARTNERS

VOLT is designed to provide immediate value to organizations seeking to accelerate their entry into digital health, AI-powered wellness, and consumer engagement markets.

HealthTech Startups

Companies looking to accelerate product development by acquiring a production-ready health platform with integrated AI coaching and modern cloud infrastructure.

Fitness & Wellness Brands

Gyms, fitness programs, nutrition brands, and wellness organizations seeking a branded digital experience to strengthen customer engagement and retention.

SaaS & Technology Companies

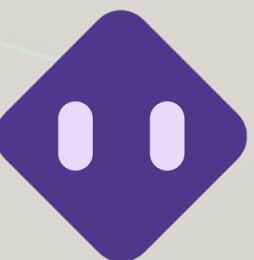

Technology businesses looking to expand into health-focused software verticals through acquisition rather than internal product development.

Investors & Product Studios

Entrepreneurs, venture studios, and investors seeking a modern software asset with multiple commercialization pathways and growth potential.

VOLT offers a unique opportunity to acquire a modern AI-native health platform without the time, cost, and risk associated with building from the ground up.

LET'S BUILD THE FUTURE OF HEALTH

What began as a vision to make health tracking smarter evolved into a fully developed AI-powered wellness platform.

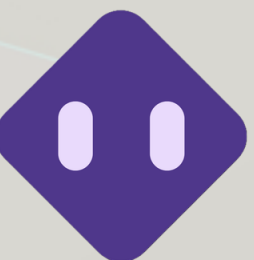

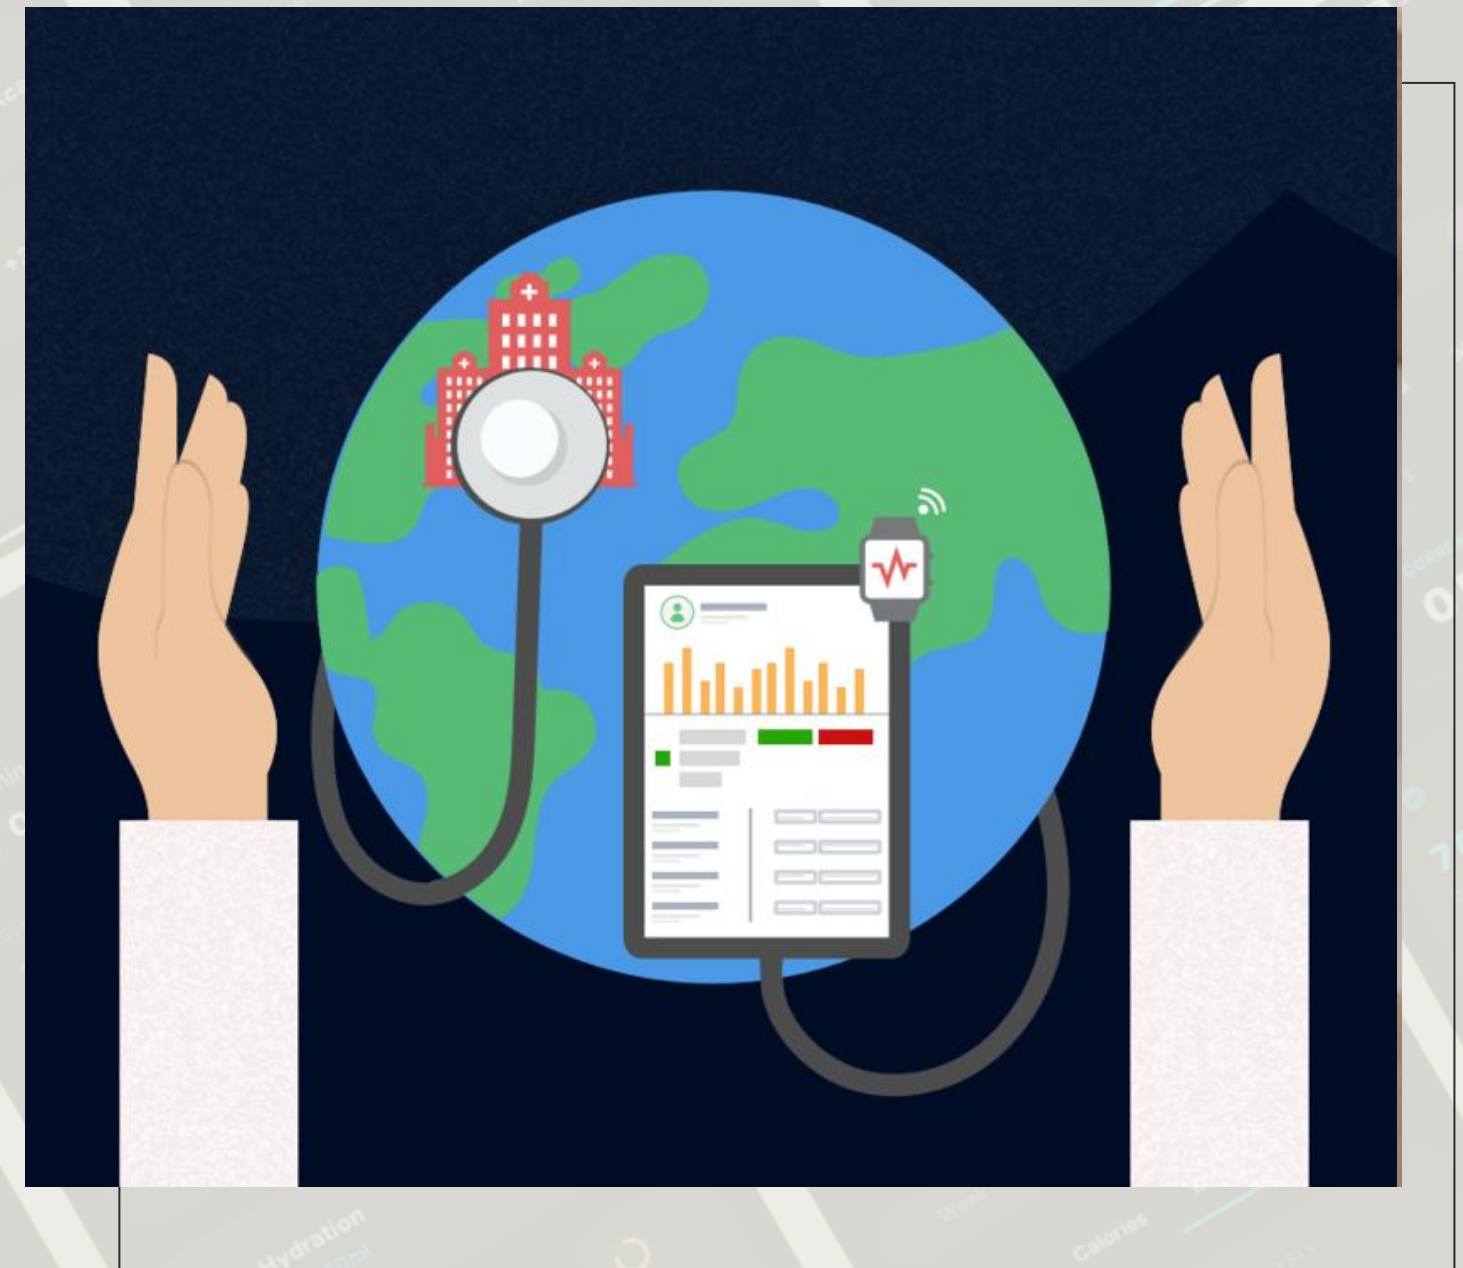

Today, VOLT stands ready for its next chapter.

Whether through acquisition, strategic partnership, or commercialization, the opportunity now exists to transform a modern technology platform into a meaningful health ecosystem capable of impacting thousands of lives.

From Product to Platform.

From Tracking to Intelligence.

From Data to Action.

Thank you!
